

Position Currently Available

- **Job function:** Energy Market Research Analyst, full-time
- **Start date:** July 2026
- **Salary:** Entry Level
- **Office location:** Shanghai, China

About Us

The Lantau Group is a leading strategy and economics consultancy with a focus on the Asia Pacific energy industry and the accelerating energy transition in general. We advise a wide range of clients across the region, including governments, regulatory bodies, leading multinationals, utilities and independent power producers, renewable energy developers and portfolio owners/operators, and many stakeholders across the rapidly evolving energy space.

The TLG Shanghai office (琅韜咨询) was established in 2021. We have built a highly skilled team with extensive experience in market forecasting and analytics, green power trading and sustainability strategy, power market policy and reform analysis, and commercial support for foreign companies.

Our team is diverse, but all share outstanding writing, analytical, and quantitative skills, in addition to a deep interest in the energy transition, including rigorously applying economics and analytic thinking to important energy-related challenges.

What We Seek

We seek candidates who have strong interests in the energy and especially electricity sector in Asia, who have excellent analytical and logical problem-solving skillsets with strong attention to detail and ability to communicate effectively in verbal and written English and Chinese. Successful candidates are those who can thrive by working independently or in a team, take initiative to complete tasks, enjoy seeking solutions, and engage in and complete challenging projects.

At TLG, you will be working with highly experienced power and energy professionals on diversified and complex engagements and, as you progress, you will gain opportunities to meet and present your findings to clients who are sector leaders in the region.

We welcome applications from highly-motivated young professionals—including recent graduates—interested in developing a career in consulting and with an interest in the Asia-Pacific energy sector. Working at The Lantau Group means a great variety of work and client exposure at an early stage, and high performers can expect rapid advancement to positions of greater responsibility.

We offer a competitive remuneration package with comprehensive medical insurance.

Key Responsibilities

- Assist project manager/consultants in executing consulting projects through rigorous research
- Create and maintain key research-driven databases to support consulting work and projects
- Identify key issues and develop comprehensive approaches to assigned tasks
- Develop well-structured and formatted drafts of reports and presentations
- Present deliverables verbally to internal and client audience in a clear manner
- Capable staff may be trained to run our in-house quantitative models tailored to regional electricity markets

Core Attributes

- Strong logical problem-solving and analytical skills
- Attention to detail in numerical analysis and written work
- Creativity, practicality, and common sense
- Ability to achieve top performance and maintain good humour under pressure

Requirements

- An undergraduate or above degree in energy/policy/economics/finance/engineering/natural sciences or other quantitative disciplines with strong academic results – GPA above 3.3 (out of 4.0) or Upper Second 2:1 degree classification or equivalent
- Proficient in MS Office, including PowerPoint, Excel and Word
- A fundamental interest in energy industry and consulting as a career choice
- Professional working proficiency in written and spoken English and Chinese
 - Chinese: pass HSK-6 or equivalent
 - English: pass CET-6 or equivalent

Additional Advantageous Skillset (But Not Required)

- Competency in non-English language is a plus
- Strong and confident verbal communications skills
- Experience in consulting, research, or analytics
- Energy industry experience—for e.g. oil, gas, coal, renewables, petrochemicals, power, and others
- Knowledge of working with Bloomberg terminal or other research platforms
- Financial modelling capability
- Other modelling capability (such as VBA, R, Python, or GAMS) is a strong plus

To be considered for this role, please apply with English CV and cover letter to shanghaicareers@lantaugroup.com with “TLG SH Energy Market Research Analyst Application” in the email subject.

Thank you for your consideration.
